Data-Warehouse-Technologien
Exercise 5

Exercise 1: Define the structural elements of the ME/R-Modelling and give an example.

Exercise 2: Explain how two different schemata can be integrated. Hereby, describe possible problems of the mapping.

Exercise 3: Model a conceptual DW-Schema in Adapt! Which additional information can be used compared to the ER-Modell?

Exercise 4: How would you transform your ER-schema of task 4.8 into a relational representation?

Exercise 5: State possible occurrences of slowly changing dimensions.

Exercise 6: How to implement the solution when as is, as off and as posted must fulfilled?

Good Luck!
